Abstract of JP 7247203 (A)

PURPOSE:To obtain a new composition of a flea controlling agent capable of manifesting more enhanced controlling effects on various fleas and safely usable at a relatively small dose.

CONSTITUTION:The characteristic of this flea controlling agent comprises mixing one or two or more selected from the group of d-resmethrin, phenothrin, prallethrin, cyphenothrin and permethrin with d-allethrin. Synergistic actions based on the flea controlling effects are obtained by using this mixed agent. A smaller dose based on the flea controlling effects enhanced by the actions can be used to enable the safe use thereof.
